PROFESSIONAL SUMMARY

Strong early-career Backend Engineer with a proven track record of architecting and deploying fault-tolerant enterprise systems in production. Combining formal Computer Science education with deep hands-on expertise in Node.js, C#, ASP.NET, and Python. Highly capable of owning system architecture, from concurrent data ingestion to complex API design. Possess strong English communication skills and a deep readiness to integrate seamlessly into international, remote, and asynchronous engineering teams. Passionate about leveraging AI-augmented workflows to deliver scalable, high-performance solutions.

TECHNICAL SKILLS

- **Backend Architecture:** Node.js, Express.js, ASP.NET, Custom Windows Services, RESTful API Design
- **Languages:** TypeScript, JavaScript, C#, Python, SQL, Bash, C, C++, Java
- **Database Systems:** SQL Server, PostgreSQL, MongoDB, MySQL
- **DevOps & Tooling:** Git, Linux (Ubuntu), Bash Scripting, Docker Deployments, Playwright
- **Protocols & Integrations:** Stripe API, Bunny CDN, TCP/IP, SNMP, Modbus, HTTP

PROFESSIONAL EXPERIENCE

LM Tech Solutions

| Cairo, Egypt

Lead Software Engineer | Nov 2025 – Present

- Engineered Unified Polling Service:** Architected a highly concurrent, fault-tolerant backend service using C# and ASP.NET to process real-time data ingestion across Modbus, HTTP, and SNMP protocols.
- Architected Enterprise IoT Platform:** Led the end-to-end backend development of Remote Monitoring System (RMS 3.0), designing a highly scalable infrastructure capable of universal device integration.
- Led Production Deployments:** Directed the backend testing, database optimization, and successful production rollout of RMS 3.0 for major national enterprise clients, including the Ministry of Interior (MOI) and GASCO.

Media Gate Company

| Cairo, Egypt

Freelance Backend Developer | Aug 2025 – Oct 2025

- Engineered Secure Payment Workflows:** Integrated the Stripe API for a commercial job board (bagijob.com), building a robust admin dashboard with automated revenue tracking and real-time approval pipelines.
- Optimized System Performance:** Accelerated video upload speeds and global media delivery by successfully integrating and configuring Bunny CDN at the backend layer.

ALX Africa

| Remote

Software Engineering Intensive | Oct 2023 – Jul 2025

- Systems Engineering:** Completed a rigorous 15-month full-stack and systems engineering program, emphasizing C, Python, and low-level Linux environments.
- API Development:** Designed and deployed scalable RESTful APIs utilizing Node.js, Express.js, and MongoDB.
- Agile Delivery:** Built and shipped 30+ production-style projects while mastering Git, Bash scripting, and remote Agile/Scrum workflows.

TECHNICAL PROJECTS

Secure Real-Time Chat System | Dec 2025

Python, TCP Sockets, AES-256 Encryption, Multi-threading

- Developed a high-performance encrypted messaging system using TCP sockets, supporting multiple concurrent users via a custom multi-threaded server architecture.
- Engineered end-to-end message security utilizing AES-256 encryption and implemented secure user authentication with SHA-256 hashing.

Tech-Road – Workforce Readiness Platform | Aug 2025

Node.js, REST API, System Architecture

- Acted as Lead Backend Developer, defining the core system architecture and REST API design.
- Built scalable endpoints to securely handle user data, bridging the gap between academic learning and real-world workforce requirements.

Inqaz-app – Emergency AI Response System | Jan 2026

Python, REST API, Systems Design

- Architected the underlying REST API and backend infrastructure to support a real-time, end-to-end emergency response platform.

EDUCATION

Bachelor of Science in Computer Science | Expected Graduation: 2027

El Sewedy University of Technology – Polytechnic of Egypt (2025 – Present)

Egyptian Russian University (2023 – 2025, Transferred)
